OUR RESULTS

During the 2006-2007 season, Journeys from PADS to HOPE served over **670 guests** through the HOPE Center (1140 E. Northwest Highway) and the 18 faith-based PADS sites throughout the Northwest Suburbs. The HOPE Center received over **6,193 visits** from people requesting services, while the PADS sites provided **12,149 overnight stays** and **36,447 meals** throughout the season. Through the combined efforts of our volunteers and staff, we were successful in **transitioning 39 clients** out of homelessness and **309 clients in the past 6 PADS** seasons out of an emotionally degrading life and into one of hope and independence, giving clients a much needed sense of belonging.

Our commitment and our hearts know no bounds. Journeys' employees are assisted by **48 HOPE Center volunteers** as well as a pool of **3,000 PADS volunteers** across **18 sites**. At the HOPE Center we are able to provide case management, mental health counseling and vocational services. Our sites provide over **42,775 volunteer hours a year**, which translates into countless opportunities for human engagement and hope for a better future for our homeless neighbors.
