Subject: sign issue

Cathy:

We were asked to determine whether the wall sign to be installed at Enopi at 41 S. Prospect requires an additional variance due to the language contained in Section 14.6.F.3. The second sentence of Section 14.6.F.3 provides, "No wall sign shall cover or interfere with architectural details or windows, or cover, wholly or partially, any wall opening." The proposed sign will be side mounted and installed in front of the door. The applicant notified the City that the door contains a section above it that is painted the same as the door and trim. The applicant also stated that it is not a window or wall opening and provided pictures of the interior and exterior of the door. Based on that information, the proposed sign conforms with Section 14.6.F.3 and an additional variance is not required.

Let me know if you have any questions or need any additional information.
